  Outside share: 63.2%
- **9. Mixed near-clique; topic unclear**
  Saved ID 8 | 13 nodes | low confidence
  Outside share: 26.5%

Descriptions are qualitative; confidence concerns the interpretation. Colours show structural groups, not observed opinions.

Outside share = boundary / (2 x internal + boundary). Coordinates and colours match the original figure. Review: 2026-10-28
